**Hiring Team****Qualitest Group**

Dear Hiring Manager,

I am writing to apply for the Full Stack Developer position at Qualitest Group. With 1.7 year of hands-on experience in full stack development, I have worked extensively on designing, developing, and deploying scalable web applications using modern JavaScript frameworks and backend technologies. My background aligns well with the requirements of this role, particularly in building robust solutions using Angular and Node.js-based architectures.

In my previous roles as a Full Stack Developer, I have collaborated closely with clients and cross-functional teams to translate business requirements into high-quality technical solutions. I have experience developing and maintaining SQL-based databases with a strong focus on performance optimization, data integrity, and scalable design. I am comfortable working in agile environments, actively participating in sprint planning, daily stand-ups, and task tracking using tools such as JIRA.

I have also worked with cloud platforms, including Microsoft Azure, for application deployment, hosting, and integration, and I am familiar with collaborating alongside DevOps and QA teams to ensure smooth releases and reliable production deployments. Code quality, peer reviews, and adherence to best practices have been a consistent part of my development workflow, and I actively contribute to team knowledge sharing and continuous improvement initiatives.

I am particularly drawn to Qualitest Group's focus on delivering high-quality, client-centric technology solutions, and I am eager to contribute my skills in full stack development to support your projects and teams.

I would welcome the opportunity to discuss how my experience and technical skill set can add value to Qualitest Group.

**Warm regards,**

**Anabil Baruah**
